To better advise our health care and life sciences clients on complex Medicare, Medicaid, and related public health programs affected by the Affordable Care Act, we opened an office in 2014 in Baltimore, right near the headquarters of the Centers for Medicare & Medicaid Services (CMS). Being so close to CMS provides even greater value to our clients and enhances the efficiency of our services. We can gain a deeper understanding of CMS rules and regulations, and clients benefit from our close working relationship with current and former CMS representatives and agency leaders.
